ABOUT ME

Student with expertise in programming, data analysis, and web development. Demonstrated ability to apply techniques and software development skills to create scalable solutions. Committed to driving organizational growth through innovative technology applications.

EDUCATION

2019 - 2020	SSC ,Board of Secondary Education , AP AP Model School, Kanigiri percentage: 98%
2020- 2022	SSC ,Board of Intermediate Education, AP AP Model College, Kanigiri percentage: 66%
2022- 2026	B.Tech in Information Technology Dhanekula Institute of Engineering and Technology, AP percentage: 80%

EXPERIENCE

May 2024 – July 2024	Python Full Stack Developer Intern – APSCHE, IITD & Blackbucks Developed a responsive website using HTML, CSS, JavaScript, Express.js, and MongoDB · Collaborated in full-stack development tasks including UI design and backend API integration
May 2025 – July 2025	ChatGPT, Prompt Engineering & Generative AI Intern– APSCHE, IITD & Blackbucks Assisted in creating and maintaining documentation for AI models, prompt templates, and generative AI procedures Developed 20+ optimized prompt templates, improving accuracy and reducing template creation time by 30%

SKILLS

- Java
- Python
- C
- HTML
- JavaScript
- React.js
- Computer Networks
- Data structures
- CSS
- C++
- MY SQL
- MongoDB
- Node.js
- VS code
- Github

PROJECTS

AI-powered loan approval classifier: Python, Scikit-learn, OpenAI API, Streamlit, built a hybrid system combining Random Forest ML model (81.6% accuracy) with ChatGPT for loan approval predictions, implemented prompt engineering to generate natural language explanations for every decision, improving user trust and transparency.

Smart health monitoring: Developed a full-stack web application that ingests real-time vital signs from an IoT-style data source, stores them in Firebase Firestore, and visualizes live heart rate and location on a React dashboard Implemented user authentication, a Python simulator for continuous vitals streaming, and real-time Firestore listeners to support continuous monitoring and provide a foundation for anomaly detection and emergency alerting

CERTIFICATES

- Python Full Stack Development – **IITD**
- ChatGPT, Prompt Engineering & Generative AI – **IITD**
- Explore Machine Learning using Python --**INFOSYS**
- Java Training – **Spoken Tutorial By IIT BOMBAY**
